BILLING CODE 7036-01-M

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-275 and 50-323]

Pacific Gas and Electric Company; Diablo Canyon Nuclear Power Plant, Unit Nos. 1 and 2 Notice of Withdrawal of Application for Amendment to Facility Operating License

The United States Nuclear Regulatory Commission (the Commission) has granted the request of Pacific Gas and Electric Company (the licensee) to withdraw its February 15, 1996, application for proposed amendment to Facility Operating License Nos. DPR-80 and DPR-82 for the Diablo Canyon

Nuclear Power Plant, Unit Nos. 1 and 2, located in San Luis Obispo County, California.

The proposed amendment would have revised Technical Specification (TS) 3.5.2, "ECCS Subsystems—Tavg Greater Than or Equal to 350°F," to change the allowed outage time (AOT) for any one safety injection (SI) pump from 72 hours to 7 days. The specific TS change proposed added a new footnote that increases the AOT for one SI pump from 72 hours to 7 days for performance of non-routine, emergent maintenance and required review by the Plant Staff Review Committee (PSRC), and Plant Manager approval prior to exceeding 72 hours.

The Commission had previously issued a Notice of Consideration of Issuance of Amendment published in the **Federal Register** on June 5, 1996 (61 FR 28619). However, by letter dated July 2, 1997, the licensee withdrew the proposed change.

For further details with respect to this action, see the application for amendment dated February 15, 1996, and the licensee's letter dated July 2, 1997, which withdrew the application for license amendment. The above documents are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and the local public document room located at California Polytechnic State University, Robert E. Kennedy Library, Government Documents and Maps Department, San Luis Obispo, California 93407.

Dated at Rockville, Maryland this 10th day of July 1997.

For The Nuclear Regulatory Commission.

Steven D. Bloom,

Project Manager, Project Directorate IV-2, Division of Reactor Projects III/IV, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-346]

In the Matter of Toledo Edison Company, Centor Service Company The Cleveland Electric Illuminating Company (Davis-Besse Nuclear Power Station, Unit 1); Exemption

I

The Toledo Edison Company, Centor Service Company, and The Cleveland Electric Illuminating Company (the licensees) are the holders of Facility Operating License No. NPF-

3, which authorizes operation of the Davis-Besse Nuclear Power Station (DBNPS), Unit 1 (the facility). The license provides, among other things, that the facility is subject to all the rules, regulations, and orders of the U.S. Nuclear Regulatory Commission (the Commission) now or hereafter in effect.

The facility is a pressurized-water reactor located at the licensees' site in Ottawa County, Ohio.

II

In 10 CFR 73.55, "Requirements for Physical Protection of Licensed Activities in Nuclear Power Reactors Against Radiological Sabotage," paragraph (a) states, in part, that "The licensee shall establish and maintain an onsite physical protection system and security organization which will have as its objective to provide high assurance that activities involving special nuclear material are not inimical to the common defense and security and do not constitute an unreasonable risk to the public health and safety."

In 10 CFR 73.55(d), "Access Requirements," paragraph (1), it is specified that "The licensee shall control all points of personnel and vehicle access into a protected area." Also, 10 CFR 73.55(d)(5) requires that "A numbered picture badge identification system shall be used for all individuals who are authorized access to protected areas without escort." It further states that individuals not employed by the licensees (for example, contractors) may be authorized access to protected areas without escort provided that the individual "receives a picture badge upon entrance into the protected area which must be returned upon exit from the protected area * * *"

By letter dated January 20, 1997, the licensees requested an exemption from certain requirements of 10 CFR 73.55. The licensees propose to implement an alternative unescorted access system that would eliminate the need to issue and retrieve picture badges at the entrance location to the protected area and would allow all individuals authorized for unescorted access, including contractors, to keep their picture badges in their possession when departing DBNPS.

III

Pursuant to 10 CFR 73.5, "Specific Exemptions," the Commission may, upon application of any interested person or upon its own initiative, grant such exemptions from the requirements of the regulations in this part as it determines are authorized by law and will not endanger life or property or the
